The laboratory is the state test establishment of the veterinary medicine. It occupies with the quality and safety of animal and vegetable products and with the quality of different sorts of feeding stuffs.

The Poltava regional state laboratory of veterinary medicine has the status of the legal person, has it's own load balancing, has it's own account in the banks of Ukraine, it's own print with the title of organization. The laboratory was registered at the direction of the Head of the Poltava regional state administration (24.09.1997, № 495).

In it's activity the laboratory uses the budgetary funds and the off-budget assets, which it receives for the contractual work.

According to the Decree of the Ministry of the Agricultural policy of Ukraine from 09.02.2001 № 21 "About the introduction of changes and add-ins to the Decree of the agricultural sector of Ukraine", the laboratory is the base organization of the metrological service which executes the metrological control and certification of town, regional, district and inter-regional state laboratories of veterinary medicine and makes the control about the laboratory - sanitary expertise in the markets.

In 2001 on the base of the laboratory was founded the Test center, which makes the tests of animal and vegetable products, feeding additions and feedings-stuffs.

The principal functions of the laboratory:

- The protection of Poltava region from the entry of the pathogens of infectious diseases of animals from the territory of other states.
- The guaranteeing of organizing and holding of the diagnostic, virological, chemical and toxicological, mycological, hematological, serologic, bacteriological, physiochemical, histological, parasitological and radiological researches.
- The determination of the quality and safety of animal and plant products and forage, forage additions and giving out of the conclusions recommendations of experts.
- The improvement of the diagnostics methods, control at the activity of the town, regional, district and inter-district state laboratory of veterinary medicine.
- The ensuring of the metrological control and the certification of the town, regional, district and inter-district state laboratory of veterinary medicine.

The laboratory has all necessary works rooms, the test equipment and the measuring technics. The highly skilled staff work in the laboratory.
